Abstract (en)

[origin: EP0529728A1] This tray consists of a plate (1) whose in-use position is horizontal, which carries a plurality of individual housings (2) for storing one lamp in each housing, and which is noteworthy in that the dimension of one individual housing (2) is of the order of magnitude of that of a lamp base (3), so that one lamp base (3) can freely penetrate into a housing (2), but a complete lamp cannot, and in that the plate (1) is fitted with fins (5, 6) which are perpendicular thereto, so that, when several trays are stacked, it keeps a specified distance between the plates. Application: in particular for handling and/or delivering lamps. <IMAGE>
