Abstract (en)

A light-sensitive silver halide color photographic material is disclosed. The material comprises a support and provided thereon photographic component layers comprising a blue-sensitive silver halide emulsion layer, a green-sensitive silver halide emulsion layer and a red-sensitive silver halide emulsion layer, wherein at least one green-sensitive silver halide emulsion layer contains a colored magenta coupler represented by the following Formula CM-1 and at least one of said photographic component layers contains a heterocyclic ring containing fog restrainer: <CHEM>
