Abstract (en)

[origin: EP0530055A1] The packaging case for contact lenses immersed in a liquid comprises a cylindrical body (10, 20) consisting of a tubular skirt (11, 21), closed at a first cross section by a concave domed wall (12, 22) which forms a receptacle for the liquid and the lens, closed by a screw cap (30, 40). The second end cross section is equipped with coupling members (14, 15; 24, 25), consisting of a crown formed from teeth (14, 24), so that it is possible to assemble two identical cases with the teeth (14, 24) engaged in the housings (25, 15). <IMAGE>
