Abstract (en)

[origin: WO9116074A1] A process for the prophylaxis and/or treatment of respiratory viruses which comprises administering topically or systemically, to an animal, at least one monoclonal antibody against at least one respiratory virus. The present invention is particularly applicable to the prophylaxis of respiratory syncytial virus, or RSV, by administering at least one monoclonal antibody against a fusion protein of respiratory syncytial virus.

Abstract (fr)

Procédé de prophylaxie et/ou de traitement de virus respiratoires consistant à administrer localement ou par voie générale, à un animal, au moins un anticorps monoclonal contre au moins un virus respiratoire. L'invention est applicable notamment à la prophylaxie du virus respiratoire syncytial, ou VRS, par administration d'au moins un anticorps monoclonal contre une protéine de fusion du virus respiratoire syncytial.
