Abstract (en)

[origin: EP0530764A2] A sole for ski boots includes standard tip (2) and heel (3). The tip and heel are slidingly associated with the ends of the shell (4) which constitutes the boot. A spring (19) and a covering element (14) are interposed between the tip and the heel. The sole allows to elastically recover the play to which the bindings are subjected during ski inflections. <IMAGE>
