Abstract (en)

[origin: EP0531190A1] The invention relates to X-ray tubes enclosed in a housing containing a cooling fluid. <??>The invention lies in the fact that at least one end part (36, 42) of the housing is elongate so as to accommodate a high-voltage power supply device (541, 542) incorporating a high-voltage output terminal connected to the anode 24 and/or the cathode 20 and low-voltage input terminals (E11, E21, E12, E22) connected to low-voltage pins (E%11, E%21, E%12, E%22) for plugging into a power supply source located outside the housing. <IMAGE>
