Abstract (en)

[origin: EP0531207A1] Ironing installation comprising: - an ironing board (1) forming a worktop (3); - a smoothing iron (6); - means for generating steam (7) from means for raising the temperature of a reserve of water; - means for diffusing the steam; and - control means for obtaining an active evaporation phase for steam-ironing, characterised in that the means (5) for diffusing the steam are incorporated in the ironing board (1), extend substantially over the entire surface of its upper plane corresponding to its worktop (3) and are capable of being activated locally by the control means during the passage of the smoothing iron (6) and vertically in line with the latter in the course of an ironing operation. <IMAGE>
