Abstract (en)

[origin: FR2664686A1] The invention relates to a device for supplying ammunition to an automatic weapon, movable in translation of motion relative to a stationary feeder. It comprises at least one slide (7) provided with means (9) for grasping an ammunition round (11), and first guide means (12, 13) for bringing the slide from an arbitrary longitudinal position relative to the weapon into a predetermined longitudinal position relative to the weapon. <IMAGE>
