Abstract (en)

[origin: EP0531690A1] The invention specifies that the connecting plug for the high-voltage connection of picture tubes be constructed such that it can be plugged in. As a result of this measure, the connecting plug can be fitted at any time, that is to say even not until directly before the connection of the image tube to the high-voltage connection. A construction of such a plug is specified. In particular, the electrically conductive connection of the high-voltage cable (25) and the contact spring (16) is constructed as a pure plug-in connection. The stripped end of the high-voltage cable (25) and the contact tongue of the contact spring (16) can also be electrically conductively connected to one another, by means of a conductive rubber. <IMAGE>
