Abstract (en)

[origin: EP0532442A1] The present invention relates to an anti-climb and energy-absorption device for rail vehicles. The device is characterised in that it consists essentially of a male support (1) fastened to one of the vehicles (3) at the end of the chassis and of a female support (2) fastened to the end of the other vehicle (4). The invention can be used more particularly in the sector of railway stock construction. <IMAGE>
