Abstract (en)

[origin: EP0532870A1] In a domestic refrigerator (10) with a refrigerating space (13) which is surrounded by a heat-insulated housing (11) and provided on its front side with a door opening (12) and the temperature of which is kept virtually constant by forced circulation of an air flow generated by a blower (18) via a flat evaporator (15) arranged in a concealed manner behind the partition wall (20) in the refrigerating space (13), the evaporator (15) is in the form of a cold wall evaporator, the refrigerating surface of which is at least partially covered by the partition wall (20) which is provided with air-guiding ducts (21, 22) on the side facing the surface. <IMAGE>
