Abstract (en)
In a switch to be used in commercial or industrial electronics, at least two, preferably three, tongued plate spring parts (4a, 4b, 4c) are formed on one switching member (4) in a manner that one (4c) of the tongued plate spring parts is extended from one base part (4i) and the other (two) tongued plate spring part(s) (4a, 4b) is/are extended from the other base part (4i), and at least two, preferably three, bent concave coupling parts (31a, 31b, 31c) which are to be coupled with the tongued plate spring parts (4a, 4b, 4c) are formed on a common terminal (3). <IMAGE>
