Abstract (en)

[origin: EP0533538A1] The invention relates to image intensifier tubes, the brightness curve of which it makes it possible to correct very simply. <??>The image intensifier tube of the invention comprises an entrance window (3), and an exit window (4) in the vicinity of which the brightness is measured. According to the invention, the exit window (4) carries a light-attenuating device (20), the opacity of which is greater in a central zone (O) than towards the edges (21). <IMAGE>
