Abstract (en)

[origin: EP0533603A1] The present invention relates to a device for adjusting the jaw transfer blade of rectilinear combers for wool and long fibres, characterised in that it consists essentially of an articulated means (A) for supporting the jaw transfer blade (8), of a device (B) for controlling the stationary comb (16) and of a means (C) for actuating the means (A) for supporting the blade (8) and the device (B) for controlling the stationary comb, cooperating with a central control cam (1). The invention can be used more particularly in the sector of the textile industry. <IMAGE>
