Abstract (en)  
[origin: EP0533973A1] Figure 1 shows an angle measuring device (1) which is mounted by means of a centering sleeve (14) on a shaft (3) of a drive unit (2). After the assembly, the centering sleeve (14) is axially displaced and decoupled as a result of which the rigid connection between shaft (3) and hub (5) necessary for the assembly is dispensed with. <IMAGE>
