Abstract (en)

[origin: EP0534004A1] A photosensitive recording material which comprises an electrically conductive support having thereon a layer containing a charge transporting compound (n-CTM-compound) capable of accepting and transporting electrons which have been obtained by radiation-activated charge-generation from a charge generating compound (CGM-compound) present in said material, wherein said n-CTM-compound corresponds to general formula (A) defined in the description.
