Abstract (en)

[origin: EP0534148A1] The invention relates to a method and a device (1) for applying material in gaps or depressions on, or in, surfaces. In this arrangement, the invention proposes to suck the material out of a material container (8) through these gaps with the aid of an exterior subatmospheric pressure. The corresponding device (1) exhibits a subatmospheric-pressure chamber (7) and a material container (8), these two chambers adjoining each other and exhibiting openings directed towards the surface to be treated.
