Abstract (en)

[origin: WO9118513A1] A yeast rehydrating composition comprising a blend of sorbitan monostearate and at least one stearic compound having a maximum HLB value of 12.5 and wherein the sorbitan monostearate and stearic compound are present in the composition in a weight ratio of between 19:1 and 1:1. The composition is dissolved in water and added to a yeast slurry before drying of the yeast. The dried yeast composition rehydrates rapidly and homogeneously by adding water.
