Abstract (en)

[origin: US5250337A] A multi-layered label for adhesively affixing to containers, such as bottles, cans, canisters, allows, at least with respect to its top sheet and intermediate sheet, a more convenient reading of the information printed thereupon if a base section (1) having an intermediate section (3) which can be turned out to the right and can be detached along a fold (4) is provided, this intermediate section (3) being covered by a top section (5) overlapping it on the right, this top section (5) being glued to the base section (1) in the left-hand edge region (6), and the top section (5) having to the left a tear-open perforation (10) and to the right a tear-off perforation (13), so that this top section (5) also can be obtained as a separate sheet.
