Abstract (en)
[origin: EP0536523A2] A connecting terminal is described in the case of which each connecting pole has a screw terminal (12, 14, 16) with a conductor protection element (20, 24) and a plug contact (18). The contact laminates (26, 28) of the plug contact (18) are in each case constructed as an integral sheet-metal stamped part with the conductor protection element (20), and produce the electrically conductive connection between the screw terminal (12, 14, 16) and the plug contact (18). <IMAGE>
