Abstract (en)
[origin: EP0536675A2] In a shelf with cantilever brackets for elongate products, having stands (1) and cantilever brackets (4) mounted thereon and having foot plates, and attachment means extending from said foot plates towards punchings (3) on the stands, to simplify assembly and to increase the load-bearing capacity and safety it is proposed according to the invention that two hammer head screws (5) are assigned as attachment means to each foot plate (7) in the upper region thereof in a paired arrangement at the same height, the foot plate (7) is provided with bores (9) to receive the ends (10) of the threads of the hammer head screws (5) and is provided in its lower region, in a paired arrangement at the same height, with two support feet (8) which can engage in a pair of punchings (3), the hammer head screws (5) firstly being inserted with their heads (6) aligned vertically through the punchings (3) of the stand flanges (2) and then, after being set transversely in the anchoring position, gripping behind said punchings with the hammer heads (6) aligned transversely. <IMAGE>
