Abstract (en)
[origin: WO9201124A1] Wall element system comprising construction components (1) to be used in semi-permanent construction. Each of these construction components (1) is composed of concrete slabs (2) with insulating material (3) between them. A profile (4) is fitted around each construction component (1) so that they can be linked together. These profiles (4) are placed between the concrete slabs (2) and do not protrude from them. The wall component system includes coupling elements (7) to be placed in the profiles (4) to link construction components (1) vertically.
