Abstract (en)

[origin: EP0537400A1] It comprises a male part (3) and a female part (2), the male part (3) consisting of a stalk (30) produced in plastic which cannot be bonded after parting, exhibiting, at one of its ends, a means of locking (31), and, at the other (32), two fins (33, 34) in the shape of a harpoon, flexible in compression and breakable when moved apart, the female part (2) consisting of a block (20) of transparent plastic in which a tubular cavity (22) is formed the end (23) of which is of a shape suitable for accommodating the end (32) of the male part (3) so that the fins (33, 34) of the latter can deploy therein, thereby preventing the withdrawal of the said stalk (30) except by damaging the said fins (33, 34). <IMAGE>
