Abstract (en)

[origin: EP0537442A2] The cover arrangement for gutters (30, 48), especially for drainage of sports fields, playgrounds or the like, has a plurality of cover elements (10), each of which encompasses a cover plate (12) and two lateral walls (14) supporting the cover plate (12) and having passage apertures (18) and, for releasable connection to adjacent cover elements (10) in the region (60, 62) of the end face, is provided with at least one connector pin (64) and/or at least one corresponding receiving aperture (66). In this arrangement, the receiving aperture (66) is of substantially elongate design and extends approximately in the longitudinal direction of the cover element (10). <IMAGE>
