Abstract (en)

[origin: EP0537445A1] The invention relates to a receptacle-sealing machine having a stripping device (5) for non-processed crown corks which is arranged in front of a feeding device (4), looking in the direction of circulation of the sealing heads (1). <??>In order to improve the effect of the stripping device (5), provision has been made according to the invention for the stripping device to have at least one magnet (6, 7, 8) which is arranged under the circulating track (19) of the sealing heads (1) and which pulls a crown cork (3), which is supported by a holding magnet (2), off the sealing element (1) against the force of the said holding magnet. <IMAGE>
