Abstract (en)
[origin: EP0537523A1] In this cooling grate according to the invention, the support surfaces (5, 5') of the grate plates (2, 2') fastened on grate-plate supports (3, 3') are provided with upwardly opening cooling-gas passage openings (10) which are designed in the form of essentially closed annular gaps so that on the one hand a particularly effective cooling of the grate plates (2, 2') and on the other hand a particularly intensive cooling of the articles transported via the cooling grate are achieved.
