Abstract (en)

[origin: WO9200956A1] Compounds useful as inhibitors of retroviral proteases characterized by the structure (I), wherein the X<1> and X<2> groups may consist of 0 to 2 alpha -amino acid groups terminally substituted by hydrogen or one of a number of end groups, and the R<1> and R<2> group can be selected from a wide variety of hydrocarbon radicals. Compounds which exhibit a protease activity inhibition constant Ki of less than 50 mu M are desired.
