Abstract (en)

A lubricant containing a fatty acid amide and fatty acid for deforming Al semi-finished products is described. Using this, Al tubes can be manufactured without problems from round blanks by extrusion. They have a spot-free and bright appearance. A cyanoacrylate adhesive can be stored in these for a longer period than is the case when using the individual lubricant components on their own.

Abstract (de)

Es wird ein Schmierstoff zum Umformen von Al-Halbzeug beschrieben, der ein Fettsäureamid und Fettsäure enthält. Damit können Al-Tuben durch Fließpressen von Ronden problemlos hergestellt werden. Sie sehen fleckenfrei und blank aus. In ihnen kann ein Cyanoacrylat-Klebstoff länger gelagert werden als bei Verwendung der einzelnen Schmierstoff-Komponenten allein.
