Abstract (en)

[origin: US5314159A] A hanging system for framed paintings and other basically plate-like objects, has at least one hanging rail attached securely to a frame and a mounting rail which is detachably mountable to the hanging rail; wherein said hanging rail has at least one fastening point by which the mounting rail is detachably fastenable to the hanging rail. Preferably, at least one hanging rail is located in each corner of the frame and the fastening point is in the form of a threaded bore. The hanging system also includes a transport frame having lengthwise sides and crosswise sides which interconnect the lengthwise sides to which outwardly projecting ends of the hanging rails are attachable. Preferably, the transport frame has lengthwise sides with longitudinally extending openings, and crossbars which extend parallel to the crosswise sides and are mounted in the longitudinally extending openings so as to be adjustably guidable therein and fixable in a lockable manner.
