Abstract (en)

[origin: EP0538957A1] A cleansing and/or freshening unit capable of being suspended from the rim of a toilet bowl for the twofold purpose of spreading a fresh odor in the toilet room and introducing active substances into the flushing water with each flush. According to the invention, the unit comprises a reservoir (3) for active substance, such as liquid containing cleansing and air freshening agent, this reservoir (3) having its contents in constant communication with a porous mass (4A) which is arranged in the path of the flushing water when a unit has been suspended in a toilet bowl. <IMAGE>
