Abstract (en)

[origin: EP0539908A1] The invention relates to a device for adjusting the closing edge (2, 2') of a closing part (1, 31) of a door or window closure with a striker (3, 3') which is to be fastened to the frame (28) and to which the closing part (1, 31) is fastened adjustably. In order to allow an exact adjustment of the closing edge even in the installed state, the closing part (1, 31) is guided in the striker (3, 3') at right angles to the closing edge (2, 2') and is continuously adjustable by means of an adjusting device (14, 14') supported against the striker (3, 3') and can be fixed by means of fixing screws (9) which are guided through longitudinal holes (8) in the striker (3, 3'). <IMAGE>
