Abstract (en)

[origin: EP0539911A1] The plaything, which lends itself to the formation of small animals or dolls, comprises essentially a main body (2) of spherical shape and two auxiliary bodies (4, 7) which reproduce anthropomorphic and/or zoomorphic parts and which have respective internal cup surfaces (6, 9) slidably coupled with the main body (2). The two auxiliary bodies (4, 7) carry complementary elements (10 to 15) together defining a ball joint whose ball centre (P) is substantially coincident with the centre of the spherical surface of the main body (2). <IMAGE>
