Abstract (en)

[origin: EP0539917A1] The bottom of the tub 1 is open and has a flange 19 for the watertight attachment of a plate-shaped electrical heating device 6. The heating-plate surface 10 is at least approximately flush with the inner face of the tub 1 and merges directly into an outlet connection 14 for the lye. To make the tub bottom as smooth as possible, the heating-plate surface 10 has a shape matching the general shape of the tub 1 in the bottom region 5. <IMAGE>
