Abstract (en)

[origin: EP0540392A1] The invention relates, in particular, to protection from X-radiation in image intensifier tube housings. <??>The housing according to the invention comprises, on the one hand, an envelope (25) of a thermoplastic material loaded with a powder of an X-radiation absorbent material, and on the other hand, a shield (24) against external magnetic fields, the said shield being in contact with the envelope. <??>The X-radiation absorbent screen thus consists at least partially of the envelope (25). <IMAGE>
