Abstract (en)

[origin: EP0540398A1] The invention provides an electrical connection assembly (20) of the type including a first (22) and second (24) complementary connectors of the type in which at least two electrical contact elements of the first connector (22) are, in the uncoupled position, electrically connected together via a connecting device including a switch which includes two contact blades and a driving member (60) subjected, on the one hand, to the action of a first spring (100) and, on the other hand, to the action of a second spring of the monostable rapid-releasing type. <IMAGE>
