Abstract (en)

[origin: WO9201773A1] This invention relates to liquid fabric care compositions comprising a microemulsified amine functional silicone for reducing fiber-fiber/yarn-yard friction and a fabric softener. The microemulsified amine functional silicone is more effective than prior art amine functional silicone macroemulsions when used with a fabric softener. Preferred compositions are aqueous based fabric care and are used in the rinse cycle of a fabric care operation.
