Abstract (en)

[origin: WO9219120A1] A device comprising a pointed element (8) integral with the end of the tape (1) which supports slide (4) and a plate (14) integral with the end of the tape (2) which supports the leader (11). Once the head (9) of the pointed element (8) is inserted in a hole (17), the pointed element (8) is guided along a channel (18) pulling with it the end of the tape (1) until the leader (11) is opposite the opening of the slide (4). Said device can be operated with only one hand.
