Abstract (en)
[origin: EP0541053A1] The invention relates to a handle with an electric switching device (2) which is designed as a unit which can be inserted into and is integrated into the hollow handle (1) and the switching contacts of which can be actuated through the wall of the handle and which is connected to an energy supply unit (5) which is likewise inserted into a seat in the hollow handle (1). The switching device (2) can have an infra-red or light-control device which is known per se and is particularly intended for arrangement on a smoke-extracting hood.
