Abstract (en)

[origin: EP0541154A1] Industrial door with raisable shutter, comprising a flexible shutter (4) which can be wound or folded up by means of a rotary winding shaft, characterised in that the said shutter is lined, at least on one of its faces, with at least one flexible strip (7, 8) oriented perpendicularly to the shaft and forming an area of greater thickness, or spacer strip (9) so that when the shutter is wound or folded up, this strip is wound or folded up on itself, so as to keep the folds or turns in the shutter separated from each other in the raised position. <IMAGE>
