Abstract (en)

[origin: EP0541414A1] Container with walls (3, 5, 7, 9) provided with vertical columns (11a, 11b... 11h) and complementary housings (13b, 13c, 13g) allowing the stacking of two containers, bearing against each other, identically oriented, and nesting in each other for successively reverse-oriented positions. According to the invention, the container has, on two opposite side walls (7, 9), on the one hand lower vertical outer ribs (25, 27) for transverse blocking, and, on the other hand, upper inner notches (29, 31) which can receive the said ribs (25, 27), in the reverse-oriented relative position of two superposed containers. Application to boxes for growing young shoots. <IMAGE>
