Abstract (en)

[origin: EP0542158A1] Packaging units for cigarette sticks conventionally consist of thin card or paper. In the latter case, opening and reclosing of the cigarette stick creates problems. The invention is intended to remedy this. To this end, a packaging blank provided as a packaging for cigarette sticks has full-area reinforcements (16, 22) in the region of closure flaps (17, 21) or plug-in tabs. <IMAGE>
