Abstract (en)
A barrier fence comprises a row of uprights (101-104) interconnected by rigid cross-members (105,106). The cross-members (105,106) are pivotally connected to the uprights (101-104) such that successive sections of the barrier can be aligned at any angle in both the vertical and horizontal planes, depending on the desired orientation or the terrain of the site. <IMAGE>
