Abstract (en)
[origin: EP0543323A2] A burner for industrial furnaces has a combustion chamber which is arranged in the furnace space and in which a mixture of combustion gas and burner air is combusted and from which a flame (89) is directed into the furnace space. An ignition chamber (68), which is separate from the combustion chamber (66) and in which a predetermined mixture of combustion gas and burner air can be adjusted, is also provided. <IMAGE>
