Abstract (en)

[origin: EP0544156A1] 2.1. In packaging paper handkerchiefs in soft packages, the individual paper handkerchiefs are to be folded in such a way that they can be removed easily and unproblematically via a removal opening of the package and can be used immediately due to a quick unfolding. <??>For the facilitated removal, the paper handkerchief folded over the length or width is folded in a zigzag manner with cross-fold lines (26, 27, 28) transversely to the direction of removal. The handkerchief is thus pulled out of the package in a zigzag manner. <??>2.2. Furthermore, for facilitated removal, a gripping tab (34) is mounted on the paper handkerchief at a free edge (20) facing a removal opening. Using this tab, the handkerchief can easily be gripped, removed and unfolded. <IMAGE>
