Abstract (en)

Handle for handling a roll of sheet material with a hollow cylindrical core, comprising a tapering bush-shaped element (1) extending from a stop edge (2) to one end, and a number of lips which are disposed near the other end between the stop edge and a flange (3) and project towards the one end, and of which at least an end part, from the stop edge, overlaps a part of the bush-shaped element adjacent thereto at a radial distance therefrom.
