Abstract (en)  
[origin: EP0544603A1] The method of decorating by sublimation consists: - in using, as support for sublimable ink, a material which is sufficiently extendible and air-permeable to be capable of adapting to the shape of the object to be decorated without the risk of damage to the decoration to be sublimated; - in encasing the object in the ink support so that all its faces are covered over; - and in placing the assembly in a machine under vacuum, known per se, which is itself introduced into a hot space in order to cause the transfer of the decoration onto all the faces of the object to be decorated.
