Abstract (en)

[origin: EP0544611A1] The installation has a stirring tank (1) into which process water has access through a duct (2) working with level control means (3) and (4), and the planchettes from a batcher (5), the tank (1) having a double propeller (7) agitator (6) in order for the mixture to be perfectly homogenized. The stirring tank (1) is provided with a number of outlets (8) to which respective ducts (9) are coupled to link the said tank to a number of nozzles (10) that are in turn positioned over the mould (11) to make the security paper, a special feature being that each such duct (9) is provided with a pump (12) working with a pressure and flow regulator (13) in order in turn for the supply from the said nozzles (10) to be perfectly homogeneous. <IMAGE>
