Abstract (en)

[origin: WO9112260A1] Compositions containing 6 halo, 2',3'-dideoxynucleoside purines and 2 amino, 6 halo, 2',3'-dideoxy-nucleoside purines are useful for the treatment of viral infections. Particularly, these compounds are useful for preventing viral replication and cytotoxic effects of human immunodeficiency virus (HIV) and hepatitis B virus in humans infected by these viruses.
