Abstract (en)

[origin: JPH05254100A] PURPOSE: To provide an inking mechanism which can reduce the number of waste sheets after a printing stoppage by using simple means. CONSTITUTION: An ink-distributing drive apparatus is provided with a clutch coupling 13 operable by a releasing device 14. In this case, a periodic axial movement of an ink-distribution roller can be suspended at the time of a printing stoppage and continuous operation of the printing unit.
