Abstract (en)

[origin: EP0545329A2] A drawer slide fitting having two drawer frames (2) to which in each case one slide rail (6) of the two slide rails (6) and a drawer slide fitting comprising two body-mounted support rails (5) are releasably attached. At its rear end, each slide rail (6) has a hook with which it can be hooked into the drawer. Catch parts (9) are provided, which project transversely to the slide direction of the slide rails (6) and fix the slide rail (6) on the drawer frame (2) in the direction of displacement of the drawer slide fitting. Mounted on the slide rails (6) is a cam body (1) which is rotatable about a horizontal axis and on which the drawer rests. The cam body (1) is mounted in a recess (4) in the upper horizontal web (6'), and the bottom (3) of the drawer rests on the cam body (1). <IMAGE>
